

# GOMBOȘ ELIZA

+40 743 931 024 | [eliza.gombos29@gmail.com](mailto:eliza.gombos29@gmail.com) | Bucharest, Romania

## Education

- 2023-2027 – **B.E. Computer Science, University POLITEHNICA of Bucharest**
  - **Expected Graduation Date:** June 2027
  - **Relevant Coursework:** Cryptography and Cryptanalysis, Data Structures and Algorithms, C Programming, Operating Systems, OOP (C++ & Java), Analog & Digital Electronics, Algorithm Optimization, Databases, Computer Architecture.
- 2018-2022 – High School Diploma, Mathematics & Informatics, National College Andrei Saguna Brasov
- **Hard Skills:** Linux, C, C++, Java, MATLAB, PowerShell, Arduino, Julia, HTML, CSS, JavaScript, Python, SQL, Verilog,
- **Soft Skills:** Adaptability, Fast Learning, Stress Management, Attention to Detail, Organization, Communication, Curiosity, Teamwork
- **Languages:** Romanian (Native), **English (C1)**, French (A2)

## Experience

### Cyber Security Incident Response Intern

BOOKING HOLDINGS | Nov 2024 – Mar 2025

- Participated in real-time security alert investigations, shadowing senior analysts and learning to handle a wide range of threats using tools such as AWS, JoeSandbox, MDATP, CrowdStrike, Darktrace, PhishER, and Cisco Umbrella.
- Analyzed suspicious indicators (links, files, user activity), developing a deeper understanding of threat behavior and networking fundamentals.
- Worked hands-on in fast-changing environments, constantly adapting to new tools, scripts and different types of alerts while improving my troubleshooting skills.

## Projects, Courses, Hackathons

- **Sep 2024 - Cyber Detection & Response Training**

*Magis Mundi by BOOKING HOLDINGS*

Training that focused on networking concepts such as Protocols, DNS, DHCP, OSI layers, Firewalls, Proxy, PICERL framework etc., types of malware such as Ransomware, Trojans, Worms etc., Phishing and Social Engineering.

- **Dec 2024 – ZebraHack**

- Web Development Hackathon*

- Me and my team have won the **second place** for building a website in 8 hours for one of the sponsors' brands focusing on their requirements while using HTML, CSS and JavaScript.

- Gained hands-on experience on working in a team to meet a company's requirements with a strict deadline, focusing on functionality as well as on design.

- **Jun 2025 – Smart Miniature Bicycle Parking System**

- University Project*

- My team and I built a model of an automated vertical bicycle parking system, using a step-by-step motor to rotate the parking belt mechanism and an **Arduino board** for interface and automation.

- **Jan 2025 – Temperature Monitoring System**

- University Project*

- Developed an Arduino system that reads temperature data from a sensor, categorizes it using LED signals, and displays the precise Celsius value on a user interface.

- **Nov 2023 – DevFest Bucharest powered by Google**

- I attended sessions about AI & Cloud Engineering delivered by Google employees from different places in the world and Google Developers Experts.

- I had the chance to talk with a lot of experienced programmers who were working in different subdomains of IT.

- **Dec 2025 – Informational Website**

- University Project*

- Created a website from scratch using technologies like HTML, CSS and JavaScript as my final project for the Web Technologies Course I attended at university.
